Classification: UNCLASSIFIED

Caveats: NONE

All,

After coordination and some schedule shifting (thanks to all), we will meet on August 28th to field view the Long Branch stream mitigation site for the I-73 project. I believe we should be able to cover the site in one day. At this time I am proposing that we meet at the Little Pee Dee State Park at 10 am on the 28th. The State Park will provide a place for us all to park our cars and then we can "ride together" to reduce the number of cars parking adjacent to the mitigation site. I will be working on finalizing arrangements with SCDOT/Baker and getting back to everyone by the end of this week. Let me know if you have any questions. Steve

Caveats: NONE

All,

I have heard from several of you who are interested in attending a field view of the Long Branch Stream mitigation site for the I-73 project. So now I am trying to set a date to do so. Right now I am looking at August 27, 28, or 29. I believe that we can complete this field view in one day, and I would propose that we would meet on site around 10 am. I would ask that if you are interested in attending, please let me know which day works for you. Once I hear from all interested, I will let you know the day.

Let me know if you have any questions. Thanks. Steve
